## Progress in Self Psychology, V. 15: Pluralism in Self Psychology

Volume 15 of Progress in Self Psychology conveys the rich pluralism of contemporary self psychology with respect to a central theoretical and clinical issue: the nature of the self and the manner in which it can best be studied. This topic is initially addressed through a series of papers reassessing selfobject transferences and the selfobject function of interpretation. It is then approached via the theory of psychoanalytic technique, with papers that focus on boundaries and intimacy and on "Surface, Depth, and the Isolated Mind". And it culminates in two case studies that elicit animated discussion delineating different perspectives - intersubjective, motivational systems, and self-selfobject - on the self in relation to the therapeutic process. Two studies comparing Melanie Klein and Heinz Kohut; a discussion of how current cultural attitudes affect parenting; a relational view of the therapeutic partnership; and an integration of Silvan Tomkin's affect theory with self psychology add breadth to this timely and provocative collection. Volume 15 includes additional letters from the Kohut Archives and a moving account of Kohut's struggle with his own impending death.
