**Java Message Service** David A Chappell, Richard Monson-Haefel

This book is a thorough introduction to Java Message Service (JMS), the standard Java application program interface (API) from Sun Microsystems that supports the formal communication known as "messaging" between computers in a network. JMS provides a common interface to standard messaging protocols and to special messaging services in support of Java programs. The messages exchange crucial data between computers, rather than between users--information such as event notification and service requests. Messaging is often used to coordinate programs in dissimilar systems or written in different programming languages. Using the JMS interface, a programmer can invoke the messaging services of IBM's MQSeries, Progress Software's SonicMQ, and other popular messaging product vendors. In addition, JMS supports messages that contain serialized Java objects and messages that contain Extensible Markup Language (XML) pages. Messaging is a powerful new paradigm that makes it easier to uncouple different parts of an enterprise application. Messaging clients work by sending messages to a message server, which is responsible for delivering the messages to their destination. Message delivery is asynchronous, meaning that the client can continue working without waiting for the message to be delivered. The contents of the message can be anything from a simple text string to a serialized Java object or an XML document. *Java Message Service* shows how to build applications using the point-to-point and publish-and-subscribe models; how to use features like transactions and durable subscriptions to make an application reliable; and how to use messaging within Enterprise JavaBeans. It also introduces a new EJB type, the MessageDrivenBean, that is part of EJB 2.0, and discusses integration of messaging into J2EE.

### From reader reviews:

#### **Donna Barragan:**

Information is provisions for anyone to get better life, information today can get by anyone on everywhere. The information can be a knowledge or any news even a problem. What people must be consider any time those information which is within the former life are challenging to be find than now could be taking seriously which one works to believe or which one typically the resource are convinced. If you receive the unstable resource then you get it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Java Message Service as the daily resource information.

#### **Christina Fitts:**

Beside that Java Message Service in your phone, it could give you a way to get more close to the new knowledge or information. The information and the knowledge you may got here is fresh in the oven so don't end up being worry if you feel like an outdated people live in narrow village. It is good thing to have Java Message Service because this book offers to you readable information. Do you occasionally have book but you would not get what it's all about. Oh come on, that will not end up to happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, including treasuring beautiful island. Use you still want to miss the item? Find this book and also read it from today!

#### **Margaret Wynkoop:**

Don't be worry when you are afraid that this book may filled the space in your house, you might have it in e-book means, more simple and reachable. This Java Message Service can give you a lot of buddies because by you considering this one book you have issue that they don't and make a person more like an interesting person. This kind of book can be one of a step for you to get success. This guide offer you information that possibly your friend doesn't recognize, by knowing more than different make you to be great men and women. So , why hesitate? Let's have Java Message Service.

#### **Judy Yelle:**

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is written or printed or highlighted from each source in which filled update of news. With this modern era like right now, many ways to get information are available for a person. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just seeking the Java Message Service when you essential it?
