Lasers for Medical Applications: Diagnostics, Therapy and Surgery (Woodhead Publishing Series in Electronic and Optical Materials)

Lasers for Medical Applications: Diagnostics, Therapy and Surgery (Woodhead Publishing Series in Electronic and Optical Materials)

Lasers have a wide and growing range of applications in medicine. Lasers for Medical Applications summarises the wealth of recent research on the principles, technologies and application of lasers in diagnostics, therapy and surgery.

Part one gives an overview of the use of lasers in medicine, key principles of lasers and radiation interactions with tissue. To understand the wide diversity and therefore the large possible choice of these devices for a specific diagnosis or treatment, the respective types of the laser (solid state, gas, dye, and semiconductor) are reviewed in part two. Part three describes diagnostic laser methods, for example optical coherence tomography, spectroscopy, optical biopsy, and time-resolved fluorescence polarization spectroscopy. Those methods help doctors to refine the scope of involvement of the particular body part or, for example, to specify the extent of a tumor. Part four concentrates on the therapeutic applications of laser radiation in particular branches of medicine, including ophthalmology, dermatology, cardiology, urology, gynecology, otorhinolaryngology (ORL), neurology, dentistry, orthopaedic surgery and cancer therapy, as well as laser coatings of implants. The final chapter includes the safety precautions with which the staff working with laser instruments must be familiar.

With its distinguished editor and international team of contributors, this important book summarizes international achievements in the field of laser applications in medicine in the past 50 years. It provides a valuable contribution to laser medicine by outstanding experts in medicine and engineering.

- Describes the interaction of laser light with tissue
- Reviews every type of laser used in medicine: solid state, gas, dye and semiconductor
- Describes the use of lasers for diagnostics

From reader reviews:

Shari Yung:

As people who live in the modest era should be revise about what going on or data even knowledge to make these people keep up with the era which can be always change and move ahead. Some of you maybe will probably update themselves by examining books. It is a good choice for you but the problems coming to an individual is you don't know which one you should start with. This Lasers for Medical Applications: Diagnostics, Therapy and Surgery (Woodhead Publishing Series in Electronic and Optical Materials) is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

James Walton:

Reading a e-book tends to be new life style with this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Along with book everyone in this world could share their idea. Publications can also inspire a lot of people. Many author can inspire their very own reader with their story or their experience. Not only situation that share in the books. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors on earth always try to improve their ability in writing, they also doing some research before they write on their book. One of them is this Lasers for Medical Applications: Diagnostics, Therapy and Surgery (Woodhead Publishing Series in Electronic and Optical Materials).

Allie Littlefield:

Do you like reading a book? Confuse to looking for your chosen book? Or your book has been rare? Why so many problem for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes looking at, not only science book but also novel and Lasers for Medical Applications: Diagnostics, Therapy and Surgery (Woodhead Publishing Series in Electronic and Optical Materials) or others sources were given knowledge for you. After you know how the truly great a book, you feel need to read more and more. Science publication was created for teacher or even students especially. Those ebooks are helping them to include their knowledge. In different case, beside science publication, any other book likes Lasers for Medical Applications: Diagnostics, Therapy and Surgery (Woodhead Publishing Series in Electronic and Optical Materials) to make your spare time a lot more colorful. Many types of book like here.

James Voyles:

A number of people said that they feel weary when they reading a publication. They are directly felt it when they get a half portions of the book. You can choose often the book Lasers for Medical Applications: Diagnostics, Therapy and Surgery (Woodhead Publishing Series in Electronic and Optical Materials) to make your reading is interesting. Your personal skill of reading talent is developing when you similar to

reading. Try to choose basic book to make you enjoy to study it and mingle the opinion about book and studying especially. It is to be initial opinion for you to like to open up a book and read it. Beside that the book Lasers for Medical Applications: Diagnostics, Therapy and Surgery (Woodhead Publishing Series in Electronic and Optical Materials) can to be your friend when you're really feel alone and confuse with the information must you're doing of these time.
