Radio Monitoring: Problems, Methods and Equipment: 43 (Lecture Notes in Electrical Engineering)

Anatoly Rembovsky, Alexander Ashikhmin, Vladimir Kozmin, Sergey M. Smolskiy

Radio Monitoring: Problems, Methods, and Equipment offers a unified approach to fundamental aspects of Automated Radio Monitoring (ARM). The authors discuss the development, modeling, design, and manufacture of ARM systems. Data from established and recent research are presented and recommendations are made on methods and approaches for solving common problems in ARM. The authors also provide classification and detailed descriptions of modern high-efficient hardware-software ARM equipment, including the equipment for detection, radio direction-finding, parameters measurement and their analysis, and the identification and localization of the electromagnetic field sources. Examples of ARM equipment structure, applications, and software are provided to manage a variety of complicated interference environment in the industrial centers, inside of the buildings, and in the open terrain. This book provides a reference for professionals and researchers interested in deploying ARM technology as a tool for solving problems from radio frequency spectrum usage control.

From reader reviews:

Mary Diaz:

Now a day people who Living in the era exactly where everything reachable by connect to the internet and the resources within it can be true or not require people to be aware of each data they get. How a lot more to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Studying a book can help individuals out of this uncertainty Information specifically this Radio Monitoring: Problems, Methods and Equipment: 43 (Lecture Notes in Electrical Engineering) book as this book offers you rich information and knowledge. Of course the data in this book hundred percent guarantees there is no doubt in it everbody knows.

Blair Chappell:

Reading a book being new life style in this 12 months; every people loves to go through a book. When you go through a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you would like get information about your research, you can read education books, but if you want to entertain yourself read a fiction books, these us novel, comics, and soon. The Radio Monitoring: Problems, Methods and Equipment: 43 (Lecture Notes in Electrical Engineering) provide you with a new experience in studying a book.

Juan Jensen:

Don't be worry in case you are afraid that this book will filled the space in your house, you can have it in e-book approach, more simple and reachable. That Radio Monitoring: Problems, Methods and Equipment: 43 (Lecture Notes in Electrical Engineering) can give you a lot of buddies because by you investigating this one book you have thing that they don't and make anyone more like an interesting person. This particular book can be one of one step for you to get success. This publication offer you information that might be your friend doesn't realize, by knowing more than some other make you to be great people. So , why hesitate? Let's have Radio Monitoring: Problems, Methods and Equipment: 43 (Lecture Notes in Electrical Engineering).

Ashley Robinette:

A lot of guide has printed but it is different. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever simply by searching from it. It is known as of book Radio Monitoring: Problems, Methods and Equipment: 43 (Lecture Notes in Electrical Engineering). You'll be able to your knowledge by it. Without leaving the printed book, it could add your knowledge and make anyone happier to read. It is most crucial that, you must aware about reserve. It can bring you from one destination for a other place.
