The Oxford English Literary History is the new century's definitive account of a rich and diverse literary heritage that stretches back for a millennium and more.

Each of these groundbreaking volumes offers a leading scholar's considered assessment of the authors, works, cultural traditions, events, and the ideas that shaped the literary voices of their age. The series will enlighten and inspire not only everyone studying, teaching, and researching in English Literature, but all serious readers.

This exciting new volume provides a freshly inclusive account of literature in England in the period before, during, and after the First World War. Chris Baldick places the modernist achievements of Virginia Woolf, T. S. Eliot, and James Joyce within the rich context of non-modernist writings across all major genres, allowing "high" literary art to be read against the background of "low" entertainment. Looking well beyond the modernist vanguard, Baldick highlights the survival and renewal of realist traditions in these decades of post-Victorian disillusionment. Ranging widely across psychological novels, war poems, detective stories, satires, and children's books, *The Modern Movement* provides a unique survey of the literature of this turbulent time.
