Black Pepper: Piper Nigrum (Medicinal & Aromatic Plants-Industrial Profiles): 13 (Medicinal and Aromatic Plants - Industrial Profiles) P.N. Ravindran

Black Pepper is the first monograph to be published on this important spice, the most widely-used by mankind. This monograph includes chapters on all aspects of the crop's botany and its improvement, agronomy, chemistry, post harvest technology, processing, diseases, insect pests, marketing, economics and uses. The available information is collected and presented for the use of students, teachers and research workers. All the chapters are written by experts in their fields.

The book -- a veritable 'treasure trove' of all that is known about the crop -- is meant for undergraduate and graduate students, teachers and researchers in the areas of agriculture, horticulture and crop botany. This will serve both as a text book and as a reference book. It is hoped that this monograph will remain the major reference source for all pepper workers for at least the next decade.
