Forest Monitoring: Chapter 1. Forest Monitoring: An Introduction (Developments in Environmental Science) Marco Ferretti

Over the past decades, the demand for and interest in harmonized data on the status of forests has changed in nature, increasing and becoming cross-sectoral. Although its history is much more recent than forest inventories, forest monitoring today has a great potential to provide useful data and information. The chapter outlines the development of monitoring needs over the past 40 years, the value of monitoring and its importance for other forms of scientific inquiry, introduces the basic methodological issues, and presents an overview of the major forest monitoring programs. Emphasis is placed on the importance that monitoring be driven by explicit objectives and grounded on solid scientific background. This chapter presents the aims and structure of the book.
