## **Hormones in Neurodegeneration, Neuroprotection, and Neurogenesis**

As life expectancy increases and population ages, the already enormous impact of neurodegeneration on society will become even larger without better prevention and treatment. Developing strategies to prevent degeneration of neurons and to promote a healthy nervous system is, thus, critical. The development of pharmacological agents that would increase production of new neurons was recently facilitated by the identification of the hormonal regulators of various steps of adult neurogenesis.

The proposed book is written by a group of top world experts involved in the study of the mechanisms of hormonal control of brain damage and repair. The effects of thyroid and steroid hormones (estrogens, androgens, progestins, gluco-mineralo-corticoids, various neurosteroids) or polypeptide hormones (CRF, urocortins, somatostatin, GH/IGF, leptin, prolactin, PACAP, erythropoetin) on neuronal survival and neurogenesis in various neurodegenerative conditions and in brain aging will be discussed in detail. The proposed book is unique because it gives a comprehensive account of the neuroprotective and neurogenic effects of steroid and polypeptide hormones. Furthermore, new pharmacological approaches for treatment of neurodegenerative conditions are presented, based on the neuroprotective and neurogenic properties of natural and synthetic hormones.

### **From reader reviews:**

#### **Percy Brown:**

This Hormones in Neurodegeneration, Neuroprotection, and Neurogenesis are reliable for you who want to certainly be a successful person, why. The main reason of this Hormones in Neurodegeneration, Neuroprotection, and Neurogenesis can be among the great books you must have is usually giving you more than just simple reading food but feed a person with information that possibly will shock your earlier knowledge. This book is definitely handy, you can bring it everywhere and whenever your conditions in e-book and printed versions. Beside that this Hormones in Neurodegeneration, Neuroprotection, and Neurogenesis forcing you to have an enormous of experience like rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day exercise. So , let's have it appreciate reading.

#### **Michael Griffin:**

This Hormones in Neurodegeneration, Neuroprotection, and Neurogenesis is great publication for you because the content that is certainly full of information for you who have always deal with world and possess to make decision every minute. This specific book reveal it info accurately using great arrange word or we can claim no rambling sentences inside it. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but difficult core information with wonderful delivering sentences. Having Hormones in Neurodegeneration, Neuroprotection, and Neurogenesis in your hand like having the world in your arm, details in it is not ridiculous a single. We can say that no reserve that offer you world inside ten or fifteen tiny right but this reserve already do that. So , this is good reading book. Hello Mr. and Mrs. stressful do you still doubt this?

#### **Martin Hanson:**
