## Automorphisms of Surfaces after Nielsen and Thurston (London Mathematical Society Student Texts)

Andrew J. Casson, Steven A. Bleiler

This book, which grew out of Steven Bleiler's lecture notes from a course given by Andrew Casson at the University of Texas, is designed to serve as an introduction to the applications of hyperbolic geometry to low dimensional topology. In particular it provides a concise exposition of the work of Nielsen and Thurston on the automorphisms of surfaces. The reader requires only an understanding of basic topology and linear algebra, while the early chapters on hyperbolic geometry and geometric structures on surfaces can profitably be read by anyone with a knowledge of standard Euclidean geometry desiring to learn more about other 'geometric structures'.

### **From reader reviews:**

#### **Mary Ponce:**

Reading a publication can be one of a lot of exercise that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people fantastic. First reading a publication will give you a lot of new data. When you read a publication you will get new information mainly because book is one of various ways to share the information or their idea. Second, reading through a book will make you more imaginative. When you reading through a book especially fictional works book the author will bring that you imagine the story how the figures do it anything. Third, you can share your knowledge to other individuals. When you read this Automorphisms of Surfaces after Nielsen and Thurston (London Mathematical Society Student Texts), it is possible to tells your family, friends and also soon about yours book. Your knowledge can inspire the mediocre, make them reading a reserve.

#### **Esther Belote:**

Reading a book tends to be new life style with this era globalization. With reading you can get a lot of information that could give you benefit in your life. With book everyone in this world can share their idea. Guides can also inspire a lot of people. Plenty of author can inspire all their reader with their story as well as their experience. Not only situation that share in the publications. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors on this planet always try to improve their proficiency in writing, they also doing some exploration before they write to their book. One of them is this Automorphisms of Surfaces after Nielsen and Thurston (London Mathematical Society Student Texts).

#### **Julia Sullivan:**

Why? Because this Automorphisms of Surfaces after Nielsen and Thurston (London Mathematical Society Student Texts) is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will zap you with the secret it inside. Reading this book close to it was fantastic author who write the book in such wonderful way makes the content on the inside easier to understand, entertaining method but still convey the meaning totally. So , it is good for you because of not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of benefits than the other book have such as help improving your expertise and your critical thinking technique. So , still want to delay having that book? If I ended up you I will go to the guide store hurriedly.

#### **Wayne Robinson:**

That guide can make you to feel relax. This specific book Automorphisms of Surfaces after Nielsen and Thurston (London Mathematical Society Student Texts) was bright colored and of course has pictures on there. As we know that book Automorphisms of Surfaces after Nielsen and Thurston (London Mathematical Society Student Texts) has many kinds or style. Start from kids until adolescents. For example Naruto or

Private investigator Conan you can read and believe that you are the character on there. Therefore , not at all of book are usually make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading which.
