Wireless networks are the fastest growing communications technology in history. Are mobile phones expressions of identity, fashionable gadgets, tools for life -- or all of the above? *Mobile Communication and Society* looks at how the possibility of multimodal communication from anywhere to anywhere at any time affects everyday life at home, at work, and at school, and raises broader concerns about politics and culture both global and local. Drawing on data gathered from around the world, the authors explore who has access to wireless technology, and why, and analyze the patterns of social differentiation seen in unequal access. They explore the social effects of wireless communication -- what it means for family life, for example, when everyone is constantly in touch, or for the idea of an office when workers can work anywhere. Is the technological ability to multitask further compressing time in our already hurried existence? The authors consider the rise of a mobile youth culture based on peer-to-peer networks, with its own language of texting, and its own values. They examine the phenomenon of flash mobs, and the possible political implications. And they look at the relationship between communication and development and the possibility that developing countries could "leapfrog" directly to wireless and satellite technology. This sweeping book -- moving easily in its analysis from the United States to China, from Europe to Latin America and Africa -- answers the key questions about our transformation into a mobile network society.

The inside or content is definitely fantastic as the outside or cover. Your reading sixth sense will directly make suggestions to pick up this book.

**Rose Heck:**

As a college student exactly feel bored to help reading. If their teacher asked them to go to the library or even make summary for some reserve, they are complained. Just very little students that has reading's spirit or real their pastime. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading really. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Mobile Communication and Society: A Global Perspective (Information Revolution and Global Politics) can make you feel more interested to read.
