Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) Srinivas Sajja, Priti

The Internet has become an integral part of human life, yet the web still utilizes mundane interfaces to the physical world, which makes Internet operations somewhat mechanical, tedious, and less human-oriented. Filling a large void in the literature, **Intelligent Technologies for Web Applications** is one of the first books to focus on providing vital fundamental and advanced guidance in the area of Web intelligence for beginners and researchers.

The book covers techniques from diverse areas of research, including:

- Natural language processing
- Information extraction, retrieval, and filtering
- Knowledge representation and management
- Machine learning
- Databases
- Data, web, and text mining
- Human–computer interaction
- Semantic web technologies

To develop effective and intelligent web applications and services, it is critical to discover useful knowledge through analyzing large amounts of content, hidden content structures, or usage patterns of web data resources. Intended to improve and reinforce problem-solving methods in this area, this book delves into the hybridization of artificial intelligence (AI) and web technologies to help simplify complex Web operations. It introduces readers to the state-of-the art development of web intelligence techniques and teaches how to apply these techniques to develop the next generation of intelligent Web applications.

The book lays out presented projects, case studies, and innovative ideas, which readers can explore independently as standalone research projects. This material facilitates experimentation with the book's content by including fundamental tools, research directions, practice questions, and additional reading.

From reader reviews:

Leticia Cantrell:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their sparetime with their family, or all their friends. Usually they doing activity like watching television, gonna beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could be reading a book could be option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of guide that you should read. If you want to try look for book, may be the guide untitled Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) can be excellent book to read. May be it may be best activity to you.

William Rocha:

Many people spending their time frame by playing outside along with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by examining a book. Ugh, think reading a book can definitely hard because you have to accept the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smartphone. Like Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) which is finding the e-book version. So , try out this book? Let's see.

India Mead:

In this particular era which is the greater person or who has ability in doing something more are more important than other. Do you want to become certainly one of it? It is just simple way to have that. What you must do is just spending your time not very much but quite enough to enjoy a look at some books. Among the books in the top list in your reading list is actually Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series). This book that is qualified as The Hungry Hillsides can get you closer in growing to be precious person. By looking way up and review this guide you can get many advantages.

Sonia Cancel:

Do you like reading a guide? Confuse to looking for your preferred book? Or your book seemed to be rare? Why so many question for the book? But just about any people feel that they enjoy intended for reading. Some people likes examining, not only science book but novel and Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) or others sources were given knowledge for you. After you know how the truly amazing a book, you feel wish to read more and more. Science reserve was created for teacher or perhaps students especially. Those textbooks are helping them to include their knowledge. In some other case, beside science publication, any other book likes Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge

Discovery Series) to make your spare time far more colorful. Many types of book like this one.
