W. Tad Pfeffer

The Opening of a New Landscape: Columbia Glacier at Mid-Retreat (Special Publications) W. Tad Pfeffer

Published by the American Geophysical Union as part of the *Special Publications Series*.

This book, beautifully illustrated with dozens of extraordinary photographs, not only tells the history of the expeditions to explore the Columbia Glacier, but also shows how warming over the last century in combination with internal physics of the glacier act to produce dramatic and unpredictable responses to climate change. In a giant transformation, not only are we losing an enormous storehouse of fresh water, but we also bear witness to the opening up of a new landscape as more and more of the land surface formerly covered by ice and snow becomes exposed to sunlight and so welcomes new communities of flora and fauna.

More than just a science story, this is a fascinating picture of how science and scientists work, of how science is carried out and advances.

One of the world's leading experts on the Columbia Glacier, W. Tad Pfeffer, scientist, writer, and photographer, is uniquely qualified to have written this absorbing and dynamic testament to this wonder of nature.
