Mathematical Essays in Honor of Gian-Carlo Rota (Progress in Mathematics) Bruce Sagan, Richard P. Stanley

In April of 1996 an array of mathematicians converged on Cambridge, Massachusetts, for the Rotafest and Umbral Calculus Workshop, two conferences celebrating Gian-Carlo Rota's 64th birthday. It seemed appropriate when feting one of the world's great combinatorialists to have the anniversary be a power of 2 rather than the more mundane 65. The over seventy-five participants included Rota's doctoral students, coauthors, and other colleagues from more than a dozen countries. As a further testament to the breadth and depth of his influence, the lectures ranged over a wide variety of topics from invariant theory to algebraic topology. This volume is a collection of articles written in Rota's honor. Some of them were presented at the Rotafest and Umbral Workshop while others were written especially for this Festschrift. We will say a little about each paper and point out how they are connected with the mathematical contributions of Rota himself.

From reader reviews:

Calvin Williams:

As people who live in often the modest era should be upgrade about what going on or facts even knowledge to make all of them keep up with the era which can be always change and make progress. Some of you maybe will probably update themselves by examining books. It is a good choice for you but the problems coming to anyone is you don't know what type you should start with. This Mathematical Essays in Honor of Gian-Carlo Rota (Progress in Mathematics) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and need in this era.

Robert Defazio:

Spent a free a chance to be fun activity to do! A lot of people spent their sparetime with their family, or all their friends. Usually they performing activity like watching television, planning to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Can be reading a book is usually option to fill your totally free time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the book untitled Mathematical Essays in Honor of Gian-Carlo Rota (Progress in Mathematics) can be excellent book to read. May be it can be best activity to you.

Darrin Russell:

In this period of time globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The actual book that recommended to you is Mathematical Essays in Honor of Gian-Carlo Rota (Progress in Mathematics) this publication consist a lot of the information from the condition of this world now. This specific book was represented how do the world has grown up. The words styles that writer use for explain it is easy to understand. The actual writer made some analysis when he makes this book. This is why this book appropriate all of you.

Tim Gonzalez:

Many people spending their time frame by playing outside with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by looking at a book. Ugh, do you consider reading a book can really hard because you have to accept the book everywhere? It fine you can have the e-book, having everywhere you want in your Cell phone. Like Mathematical Essays in Honor of Gian-Carlo Rota (Progress in Mathematics) which is finding the e-book version. So , try out this book? Let's see.
