GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking)

Adrian Farrel, Igor Bryskin

GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) Adrian Farrel, Igor Bryskin

The last two years have seen significant developments in the standardization of GMPLS and its implementation in optical and other networks. *GMPLS: Architecture and Applications* brings you completely up to date, providing the practical information you need to put the growing set of GMPLS-supported services to work and manage them effectively.

This book begins by defining GMPLS's place in a transport network, leveraging your knowledge of MPLS to give you an understanding of this radically new control plane technology. An overview of GMPLS protocols follows, but the real focus is on what comes afterwards: in-depth examinations of the architectures underpinning GMPLS in real-world network environments and current and emerging GMPLS applications. This one-of-a-kind resource delivers immensely useful information for software architects, designers and programmers, hardware developers, system testers, and network operators--and also for managers and other decision-makers.

- + Written by two industry researchers at the forefront of the development of GMPLS.
- + Provides a practical look at GMPLS protocols for signaling, routing, link and resource management, and traffic engineering.
- + Delves deep into the world of GMPLS applications, including traffic engineering, path computation, layer one VPNs, point-to-multipoint connectivity, service management, and resource protection.
- + Explores three distinct GMPLS control plane architectures: peer, overlay, and hybrid, and explains the GMPLS UNI and NNIs.
- + Explains how provisioning challenges can be met in multi-region networks and details the provisioning systems and tools relied on by the GMPLS control plane, along with the standard MIB modules used to manage a GMPLS system.

From reader reviews:

Joshua West:

This GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this e-book incredible fresh, you will get details which is getting deeper an individual read a lot of information you will get. This kind of GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) without we comprehend teach the one who looking at it become critical in considering and analyzing. Don't possibly be worry GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) can bring if you are and not make your handbag space or bookshelves' turn out to be full because you can have it in the lovely laptop even cell phone. This GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) having good arrangement in word along with layout, so you will not truly feel uninterested in reading.

Marie Clemmer:

This book untitled GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) to be one of several books in which best seller in this year, here is because when you read this e-book you can get a lot of benefit into it. You will easily to buy this particular book in the book store or you can order it by way of online. The publisher in this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Smart phone. So there is no reason to your account to past this book from your list.

Jennifer Johnson:

Do you have something that you prefer such as book? The publication lovers usually prefer to pick book like comic, limited story and the biggest an example may be novel. Now, why not hoping GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) that give your fun preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the method for people to know world far better then how they react in the direction of the world. It can't be stated constantly that reading habit only for the geeky man but for all of you who wants to become success person. So , for all you who want to start reading through as your good habit, it is possible to pick GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) become your personal starter.

Clifford White:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you will get it in e-book technique, more simple and reachable. This particular GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking) can give you a lot of friends because by you investigating this one book you have issue that they don't and make you actually more like an interesting person. This book can be one of one step for you to get success. This book offer you information that might

be your friend doesn't know, by knowing more than different make you to be great people. So , why hesitate?
We should have GMPLS: Architecture and Applications (The Morgan Kaufmann Series in Networking).
