## Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing) Marek R. Ogiela, Urszula Ogiela

In recent years, cryptographic techniques for protecting and hiding secret information have been included in directions of research on intelligent information management. Data can be managed securely due to the use of algorithms for ensuring the confidentiality of data, information splitting techniques as well as protocols for sharing information and methods of its reconstruction.

This is why techniques of advanced splitting and reconstruction of information form the primary subject of *Secure Information Management Using Linguistic Threshold Approach*, whose main purpose is to discuss the so-called linguistic threshold schemes for information sharing. An attempt is also made to describe the opportunities of using these techniques to create new models of managing strategic information shared within a commercial organisation or a state institution. Such information is specially protected, and its contents are used only if the authorised users are enabled to access it. This monograph attempts to define a model structure of information flow and for assigning information shares to particular groups of individuals concerned. The proposed information flow model can be integrated into practical solutions within any organisation or institution, improving the functionality of its legacy information systems.

The use of strong mathematical cryptographic models to manage information constitutes a scientific innovation and a demonstration of the methods and opportunities of using advanced techniques for confidentially exchanging information in tasks supporting data flow within a commercial organisation.

The interdisciplinary nature of the solutions proposed means that the subject of linguistic threshold schemes forming part of intelligent information management becomes a new challenge for the research and application work carried out.

The authors of this monograph hope that it will guide readers on an interesting journey through the cutting edge solution in the field of secure information management.

### **From reader reviews:**

#### **Linda Pillar:**

The book *Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing)* gives you the sense of being enjoy for your spare time. You should use to make your capable much more increase. Book can to get your best friend when you getting stress or having big problem along with your subject. If you can make reading through a book *Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing)* to get your habit, you can get more advantages, like add your current capable, increase your knowledge about a few or all subjects. You may know everything if you like open up and read a book *Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing)*. Kinds of book are several. It means that, science publication or encyclopedia or other folks. So , how do you think about this book?

#### **Alice Lawson:**

Here thing why this *Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing)* are different and trusted to be yours. First of all reading a book is good however it depends in the content of it which is the content is as delightful as food or not. *Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing)* giving you information deeper and different ways, you can find any guide out there but there is no reserve that similar with *Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing)*. It gives you thrill studying journey, its open up your personal eyes about the thing that will happened in the world which is might be can be happened around you. It is possible to bring everywhere like in park, café, or even in your method home by train. When you are having difficulties in bringing the published book maybe the form of *Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing)* in e-book can be your choice.

#### **Allen Grimm:**

In this time globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. Often the book that recommended to your account is *Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing)* this guide consist a lot of the information with the condition of this world now. That book was represented how do the world has grown up. The language styles that writer use to explain it is easy to understand. Typically the writer made some analysis when he makes this book. That's why this book suitable all of you.

**Judy Newberry:**

Beside that Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing) in your phone, it can give you a way to get closer to the new knowledge or data. The information and the knowledge you may get here is fresh from your oven so don't become worry if you feel like an old people live in narrow community. It is good thing to have Secure Information Management Using Linguistic Threshold Approach (Advanced Information and Knowledge Processing) because this book offers to you readable information. Do you often have book but you do not get what it's exactly about. Oh come on, that will not happen if you have this in your hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss it? Find this book along with read it from at this point!
