The purpose of this chapter is to examine hidden factors affecting neurofeedback treatment. It proposes a sociotechnical systems field theory of the neurofeedback treatment setting to help the therapist think about these factors beyond the specifics of this article. A typology of therapist styles in this model is proposed – Buddy, Technocrat, Integrated Practitioner and Withdrawn – to help the therapist identify his or her impact on the field of treatment. Case vignettes are presented as illustrations, along with one case with qEEG data. Genetics, illicit and prescribed drugs, patient variables, therapist variables, historical factors, suggestions for clinical hygiene and guides for treatment are presented.
