Natural Resources Conservation Law (SAGE Law) Sairam Bhat

This book presents a critical analysis of India's environment pollution and protection scenario, following the 'State-Pressure-Response' framework to analyse the parameters of conservation. It advocates that the role of environmental law should not be restricted to mere prevention and control of pollution but should encompass conservation and regeneration of natural resources too.

The book also reflects on India's management policy regarding resource conservation and highlights the international laws on arbitration in environmental matters. It is a one stop reference for all debates and discussions on environment with a global perspective.
