Children and the Capability Approach (Studies in Childhood and Youth)

Children and the Capability Approach (Studies in Childhood and Youth)

This collection places children's issues at the centre of understandings of human development. Using Amartya Sen's 'Capability Approach', the contributors to this book draw on new tools and theoretical perspectives to understand the role of children in human development. Looking at a wide range of themes including child poverty, microfinance, disability, education, the built environment, the role of emotions and promoting children's active participation, this study furthers the capability approach as a key theoretical perspective in understanding children and development.
