Lens Design Fundamentals Rudolf Kingslake, R. Barry Johnson

- Thoroughly revised and expanded to reflect the substantial changes in the field since its publication in 1978
- Strong emphasis on how to effectively use software design packages, indispensable to today's lens designer
- Many new lens design problems and examples - ranging from simple lenses to complex zoom lenses and mirror systems - give insight for both the newcomer and specialist in the field

Rudolf Kingslake is regarded as the American father of lens design; his book, not revised since its publication in 1978, is viewed as a classic in the field. Naturally, the area has developed considerably since the book was published, the most obvious changes being the availability of powerful lens design software packages, theoretical advances, and new surface fabrication technologies.

This book provides the skills and knowledge to move into the exciting world of contemporary lens design and develop practical lenses needed for the great variety of 21st-century applications. Continuing to focus on fundamental methods and procedures of lens design, this revision by R. Barry Johnson of a classic modernizes symbology and nomenclature, improves conceptual clarity, broadens the study of aberrations, enhances discussion of multi-mirror systems, adds tilted and decentered systems with eccentric pupils, explores use of aberrations in the optimization process, enlarges field flattener concepts, expands discussion of image analysis, includes many new exemplary examples to illustrate concepts, and much more.

Optical engineers working in lens design will find this book an invaluable guide to lens design in traditional and emerging areas of application; it is also suited to advanced undergraduate or graduate course in lens design principles and as a self-learning tutorial and reference for the practitioner.

Rudolf Kingslake (1903-2003) was a founding faculty member of the Institute of Optics at The University of Rochester (1929) and remained teaching until 1983. Concurrently, in 1937 he became head of the lens design department at Eastman Kodak until his retirement in 1969. Dr. Kingslake published numerous papers, books, and was awarded many patents. He was a Fellow of SPIE and OSA, and an OSA President (1947-48). He was awarded the Progress Medal from SMPTE (1978), the Frederic Ives Medal (1973), and the Gold Medal of SPIE (1980).

R. Barry Johnson has been involved for over 40 years in lens design, optical systems design, and electro-optical systems engineering. He has been a faculty member at three academic institutions engaged in optics education and research, co-founder of the Center for Applied Optics at the University of Alabama in Huntsville, employed by a number of companies, and provided consulting services. Dr. Johnson is an SPIE Fellow and Life Member, OSA Fellow, and an SPIE President (1987). He published numerous papers and has been awarded many patents. Dr. Johnson was founder and Chairman of the SPIE Lens Design Working Group (1988-2002), is an active Program Committee member of the International Optical Design Conference, and perennial co-chair of the annual SPIE Current Developments in Lens Design and Optical Engineering Conference.

From reader reviews:

Gerald Warfield:

This Lens Design Fundamentals book is not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is definitely information inside this book incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. This particular Lens Design Fundamentals without we know teach the one who examining it become critical in imagining and analyzing. Don't end up being worry Lens Design Fundamentals can bring once you are and not make your carrier space or bookshelves' grow to be full because you can have it with your lovely laptop even telephone. This Lens Design Fundamentals having great arrangement in word and layout, so you will not feel uninterested in reading.

Margaret Barone:

Reading a reserve tends to be new life style with this era globalization. With studying you can get a lot of information that may give you benefit in your life. With book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their reader with their story or perhaps their experience. Not only the storyplot that share in the textbooks. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors these days always try to improve their skill in writing, they also doing some research before they write for their book. One of them is this Lens Design Fundamentals.

Frank Cockerham:

This Lens Design Fundamentals is great guide for you because the content that is certainly full of information for you who always deal with world and get to make decision every minute. This particular book reveal it facts accurately using great plan word or we can declare no rambling sentences in it. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but challenging core information with lovely delivering sentences. Having Lens Design Fundamentals in your hand like keeping the world in your arm, details in it is not ridiculous one. We can say that no e-book that offer you world with ten or fifteen minute right but this publication already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. hectic do you still doubt in which?

Flor Rieke:

Don't be worry when you are afraid that this book will probably filled the space in your house, you can have it in e-book way, more simple and reachable. This specific Lens Design Fundamentals can give you a lot of buddies because by you considering this one book you have point that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This e-book offer you information that probably your friend doesn't realize, by knowing more than various other make you to be great persons. So , why hesitate? Let us have Lens Design Fundamentals.
