## **Attachment Security and the Social World** Antigonos Sochos

Antigonos Sochos develops the notion of attachment from a dyadic phenomenon to a collective one. He proposes that, like individuals, social groups also collectively seek protection and security in reference to their ideologies and social institutions. Social groups informed by collective attachment representations underpinned by insecurity tend to construct ideological and institutional systems that are unable to promote a genuine sense of group safety. Such groups are likely to resort to ideological rigidity, insularity, dysfunction, and conflict with other groups. Insecure collective attachment is typically constructed in relation to social experiences of coercion, violence, and trauma. This book explores the American-led response to the 9/11 attacks with a particular reference to the invasions of Iraq and Afghanistan and argues that this was a response predominantly guided by insecure collective attachment representations. As the 9/11 attacks activated collective attachment, the American and other western societies drew on their long social history of coercion, violence, and trauma only to construct an incoherent collective attachment narrative and engage in ineffective protective action. With an overview of older essential studies and new contributions to the field, this book extends attachment theory by demonstrating how it can inform wider socio-cultural phenomena.
