*Raoul Bott, Loring W. Tu*

**Differential Forms in Algebraic Topology (Graduate Texts in Mathematics)** Raoul Bott, Loring W. Tu  
Developed from a first-year graduate course in algebraic topology, this text is an informal introduction to some of the main ideas of contemporary homotopy and cohomology theory. The materials are structured around four core areas: de Rham theory, the Čech-de Rham complex, spectral sequences, and characteristic classes. By using the de Rham theory of differential forms as a prototype of cohomology, the machineries of algebraic topology are made easier to assimilate. With its stress on concreteness, motivation, and readability, this book is equally suitable for self-study and as a one-semester course in topology.

### **From reader reviews:**

#### **Dorothy Waddell:**

Book is to be different for every grade. Book for children until adult are different content. As we know that book is very important for us. The book Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) had been making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The reserve Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) is not only giving you a lot more new information but also to become your friend when you feel bored. You can spend your current spend time to read your reserve. Try to make relationship with the book Differential Forms in Algebraic Topology (Graduate Texts in Mathematics). You never sense lose out for everything should you read some books.

#### **Colin Wegner:**

Spent a free the perfect time to be fun activity to do! A lot of people spent their sparetime with their family, or their particular friends. Usually they accomplishing activity like watching television, planning to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Could be reading a book may be option to fill your free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to consider look for book, may be the book untitled Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) can be very good book to read. May be it is usually best activity to you.

#### **Sam Dickson:**

Many people spending their moment by playing outside having friends, fun activity together with family or just watching TV all day long. You can have new activity to shell out your whole day by examining a book. Ugh, you think reading a book can really hard because you have to accept the book everywhere? It fine you can have the e-book, getting everywhere you want in your Cell phone. Like Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) which is getting the e-book version. So , why not try out this book? Let's view.

#### **Robin Adams:**

As we know that book is vital thing to add our understanding for everything. By a reserve we can know everything we would like. A book is a range of written, printed, illustrated or even blank sheet. Every year seemed to be exactly added. This book Differential Forms in Algebraic Topology (Graduate Texts in Mathematics) was filled regarding science. Spend your time to add your knowledge about your science competence. Some people has various feel when they reading any book. If you know how big good thing about a book, you can sense enjoy to read a reserve. In the modern era like currently, many ways to get book you wanted.
